Mobile material handling machine

## **730** Advanced. The E-Series.

1974: Timber handling machine with elevated cab

#### What makes up the E-Series

- 60 years of experience in designing and constructing hydraulic material handling machines
- Uncompromisingly high performance in all areas: focus on material handling
- Technology that can be mastered: high-quality components without over-engineering
- Long product service life and high value retention

#### Your top benefits:

Green Efficiency
Save fuel - reduce operating costs
Work quietly - protect operator and environment

Peak performance
Durable mechanical systems – stressed parts optimized
High speeds – high load capacities

Maximum operating comfort

Comfortable Maxcab operator cab – relaxed work

SENCON – SENNEROGEN Control System

SENCON – SENNEBOGEN Control System

Maintenance and service made easy
Easy fault diagnosis - central reading points
Easy maintenance - clear labeling

Consultation and support
3 production sites - 2 subsidiaries
120 sales partners - over 300 service stations

## **730** The timber handling machine

#### Fully equipped standard

#### Powerful, automotive driving

- Robust undercarriage with powerful, quiet engine
- Can pull up to 25 t
- Maximum driving convenience with parking brake and automatic brake release
- Driver assist systems to
- automatically detect and switch direction of travel and direction of steering
- Top stability thanks to 8 tires

# with parking conditions asse

#### Small ballast - compact dimensions

- Low front and rear radius for optimal maneuverability, especially in tight spaces
- High safe working loads with low deadweight

#### **Green Efficiency**

- Complies with Emission Tier IV, DEF clean exhaust technology
- Economical thanks to EcoMode, automatic idle and automatic start-stop

Less deadweight for driving = save up to 20% more fuel

#### Perfect overview

- Stable cab height elevation up to 1.0 m or 1.5 m (option)
- Rear boom gives unobstructed view from cab
- Right and rearview cameras

#### Maximum safety

- Robust, all-round protective grating for cab
- Safe access to cab and uppercarriage thanks to stable grip handles and no-slip surfaces
- Sliding door for convenience and safety
- Stable railing on uppercarriage

## **730** The E-Series. Pure comfort.

#### Maxcab comfort cab

- Air-suspension comfort seat with heater
- Convenient joystick control
- Joystick in seat bracket, moves with seat
- Sliding door, platform in front of cab
- Color monitor for right-side and rear-facing camera feeds
- SENNEBOGEN OptiMode: Various modes to optimize performance

- Clear menu
- Determine operating values without the need for additional instruments
- Fast troubleshooting thanks to detailed messages

#### **Driver comfort**

- No-slip access ladders for safely accessing the machine
- Sliding door makes entering and exiting easy and safe
- Pleasant work environment thanks to low noise emissions

#### Automatic climate control

- Consistently pleasant cab climate thanks to 10 evenly distributed air vents
- Central controls make operation easy

## **730** Maintenance and service made easy

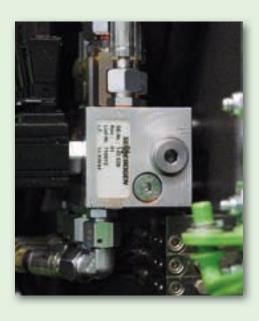

#### **Optimized for maintenance**

- Fast and easy diagnosis thanks to straightforward and clearly labeled electrical distributor
- Easy access to all service points on the machine
- Automatic central lubrication for equipment and slewing gear raceway

#### HydroClean\*

- Optimal protection of hydraulic components thanks to 3 µm micro-filter
- Cleaner hydraulic oil, longer service life

#### **Central reading points**

- Easily accessible, central reading points
- Quickly inspect entire hydraulic system

#### Clear labeling

- All parts labeled with a unique part number
- Easy and reliable spare parts ordering

\* Optional

# **730** Technical data, equipment

## MACHINE TYPE Model (type) 730

<b>ENGINE</b>	
Power	164 kW at 2,000 rpm (Stage IIIa) 168 kW at 2,200 rpm (Stage V) 186 kW at 2,000 rpm (Stage V, operating point)
Model	Cummins QSB 6.7 - C220 Stage IIIa/V Cummins B 6.7 - Stage V Direct injection, turbo-charged, charge air cooler, reduced emissions, Eco Mode, automatic idle, automatic stop
Cooling	Water-cooled, cooler fan reversal
Diesel filter	With water separator and heating system
Air filter	Dry filter with integrated pre-separator, automatic dust discharge, main element and safety element, contamination indicator
Fuel tank	460 l
DEF tank	45 l
Electrical system	24 V
Batteries	<b>2x 150 Ah</b> cold-start high-performance batteries
Options	<ul><li>Engine block heater</li><li>Electric fuel pump</li><li>Jump-start terminals</li></ul>

UPPERCARRIAGE		
Design	Torsion-resistant box design, precision craf- ted, steel bushings for boom brackets	
	Extremely service-friendly design, longitudinal engine	
Central lubrica- tion	Automatic central lubrication for equipment and slewing gear raceway	
Electrical sys- tem	Central electrical distributor, battery disconnect switch	
Cooling system	3-circuit cooling system with high cooling output, thermostatically regulated fan drive for oil cooler and water cooler, fan reversal for cleaning	
Safety	Right and rear cameras, emergency control of main functions	
Options	<ul> <li>Slewing gear brake via foot pedal</li> <li>LED lighting package</li> <li>Fire extinguisher</li> <li>Electric heater for hydraulic tank</li> <li>Low temperature package</li> <li>360° uppercarriage railing</li> </ul>	

HYDRAULIC SYSTEM	
Load sensing/LUDV hydraulic system, hydraulic pilot-controlled work functions, load limit sensing control	
Pump type	Swashplate-type variable-displacement piston pump, load pressure-independent flow distribution for simultaneous, independent control of work functions
Pump control	Zero-stroke control, on-demand flow control - the pumps only pump as much oil as will actually be used, pressure purging, load limit sensing control
Operating pressure	max. 350 bar
Filtration	High-performance filtration with long change interval
Hydraulic tank	390 l
Control system	Proportional, precision hydraulic actuation of work movements, 2 hydraulic servo joysticks for the work functions, additional functions via switches and foot pedals
Safety	Hydraulic circuits with safety valves, secured emergency lowering of the equipment at engine standstill
Options	<ul> <li>3 µm hydraulic micro-filter - SENNEBOGEN HydroClean</li> <li>Bio-oil - environmentally friendly</li> <li>ToolControl for programming pressure/rate for up to 10 tools</li> </ul>

SLEWING DRIVE		
Gearbox	Compact planetary gear with slant-axis hydraulic motor, integrated brake valves	
Parking brake	Spring-loaded multi-disk brake	
Slewing ring	External gear slewing ring with 360° protection and pinion gear lubrication	
Slewing speed	0–7 rpm, variable	

Subject to change.

# **730** Technical data, equipment

CAB (CAB)	
Cab type	Rigid cab height elevation 1 m
Cab equipment	Sliding door, excellent ergonomics, automatic climate control, heated, air-suspension comfort seat, fresh/circulating air filter, joystick control, 12 V/24 V connections, SENCON V2
Cab protection	Strong, all-round protective grating for cab
Options	<ul> <li>Rigid cab height elevation 1.50 m</li> <li>Auxiliary heating system with timer</li> <li>Active-charcoal outside air filter for cab, ideal for waste recycling</li> <li>Steering wheel with adjustable steering column</li> <li>Sliding window in operator door</li> <li>Armored glass windshield, additional safety</li> <li>Armored glass roof window, additional safety</li> <li>Safety side window and rear window</li> <li>Rolling shade for roof window and windshield</li> <li>Radio and CD player with speakers</li> <li>Hydraulic folding rigid cab elevation</li> <li>Platform next to cab</li> </ul>

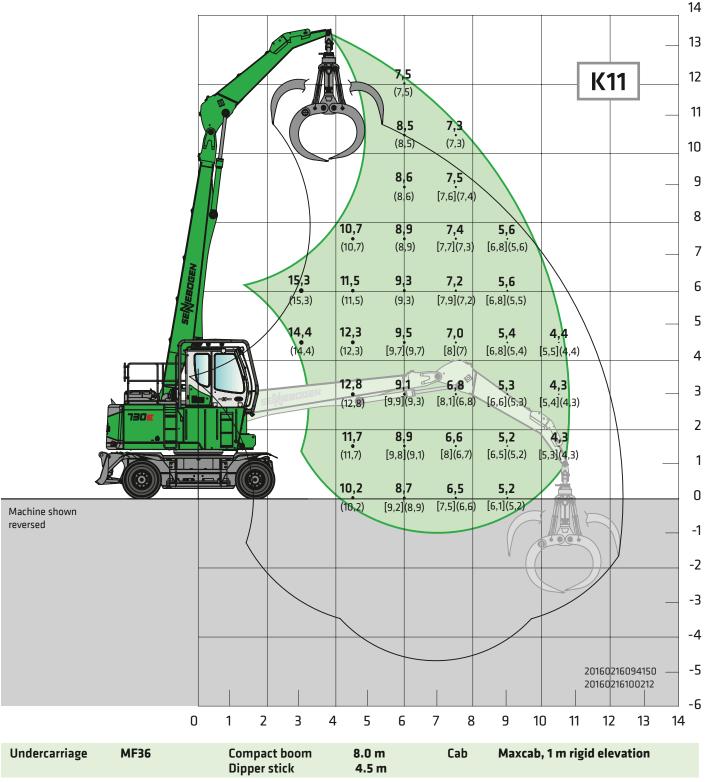

<b>ATTACHMENTS</b>	
Design	Decades of experience, state-of-the-art computer simulation, highest level of stability, longest service life, large-dimensioned and low-maintenance bearing points, sealed special bearing bushes, precision-crafted, quick-release couplings on the connections open/close/rotate grapple
Cylinders	Hydraulic cylinders with high-quality sealing and guide elements, end position damping, sealed bearing points, pipe fracture safety valves for the hoist and stick cylinders
Options	<ul> <li>Ball valves on the hydraulic lines         Open, close, rotate grapple     </li> <li>Maritime climate varnishing</li> <li>Maritime climate coating of all cylinders, nickel-plated and chrome-plated</li> <li>Float position of the equipment</li> <li>Hoisting limiter / stick limitation adjustable for stop settings, e.g. in the hall</li> </ul>

<b>UNDERCARRIAGE</b>	
Design	Stable welded construction in box design, Type MF36E
Drive	All-wheel drive powered by a variable-displacement hydraulic motor with direct-mounted, automatically actuated brake valve and 2-stage power shift transmission Planetary axles with integrated steering cylinders, disk service brake in 2-circuit system, automatic central lubrication, steering direction reversal, direction of travel reversal, travel drive protection
Parking brake	Spring-loaded multi-disk brake
Tires	<b>12.00-20,</b> 8x
Speed	<b>0-7 kph</b> level l <b>0-20 kph</b> level ll
Options	<ul><li>Preparation for trailer hitch</li><li>Rear shovel plate</li><li>Fenders</li></ul>

<b>OPERAT</b>	ING WEIGHT
Mass	<b>Approx. 34,100 kg</b> Basic machine 730 M with dozer blade, incl 2.0 m <sup>2</sup> grapple
Notice	Operating weight varies by model.

Subject to change.

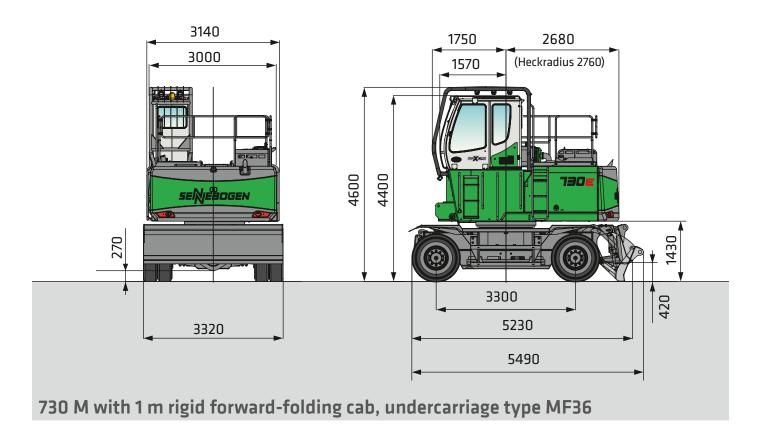

All load ratings are specified in tons (t) and apply at the end of the stick, without attachment, on a load-bearing, solid and level ground. Attachments such as grapple, load hook, et cetera are part of the specified load ratings.

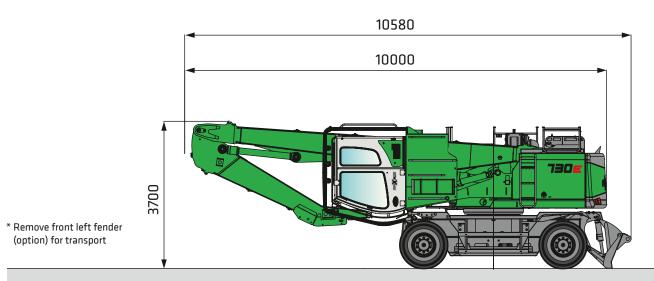

The specified values apply to stationary operation at a work range of 360°, on wheels without outrigger support and with blocked pendulum axle. The values in square brackets [] apply to stationary operation at an uppercarriage position longitudinal to the undercarriage, on wheels, without outrigger support, and with blocked pendulum axle. In accordance with ISO 10567, these values represent 75% of the static tipping load or 87% of the hydraulic lifting force. The values in parentheses () apply to mobile operation at an uppercarriage position longitudinal to the undercarriage, on wheels, and activated pendulum axle. In accordance with DIN EN 474-5 these values represent 60% of the static tipping load.

If the machine is operated in stationary mode in hoist implementation, then in accordance with DIN EN 474-5, the machine must be equipped with pipe fracture safety devices on the hoist cylinders of the boom and an overload warning device.

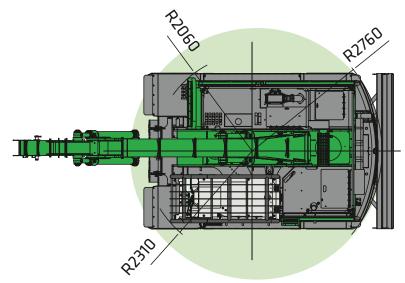

#### 730 M transport dimensions

#### Note:

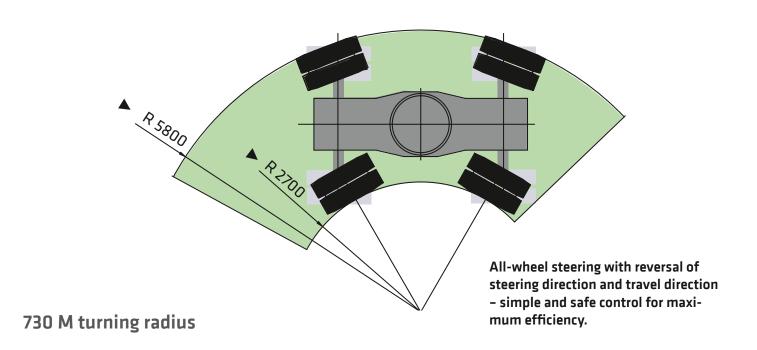

This catalog describes machine models, scopes of equipment of individual models, and configuration options (standard equipment and optional equipment) of the machines delivered by SENNEBOGEN Maschinenfabrik. Machine illustrations can contain optional equipment and supplemental equipment. Actual equipment may vary in a tolerance range depending on the country to which the machines are delivered, especially in regard to standard and optional equipment

### **730** Dimensions

Extremely compact dimension for storage space and less traffic area. Compact uppercarriage dimensions for use in tight spaces. Space-saving, optimal maneuverability and safety.

#### 730 M swivel radii

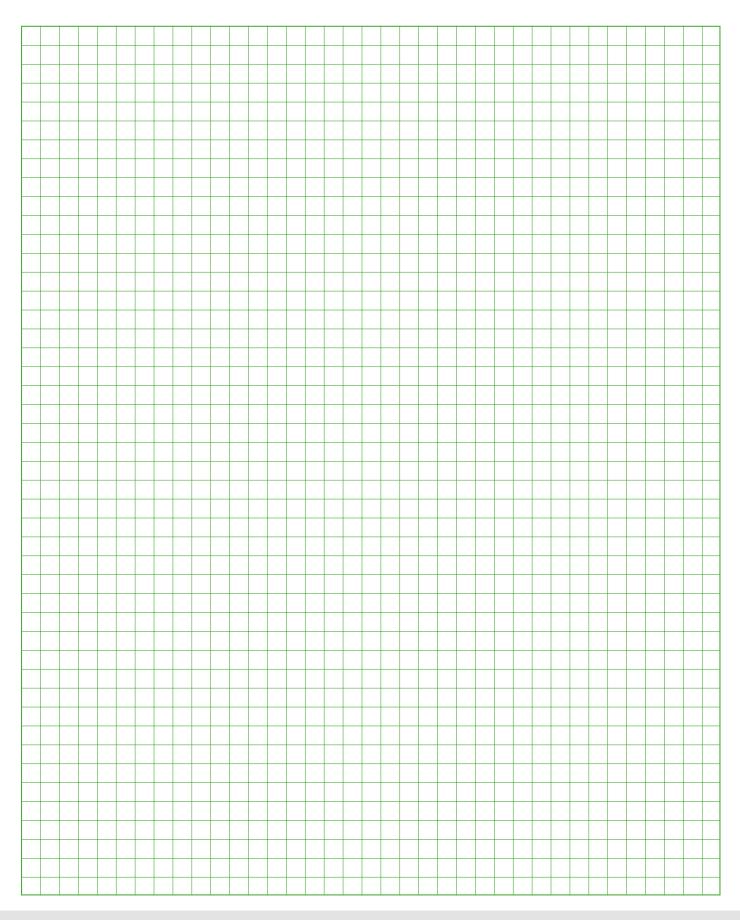

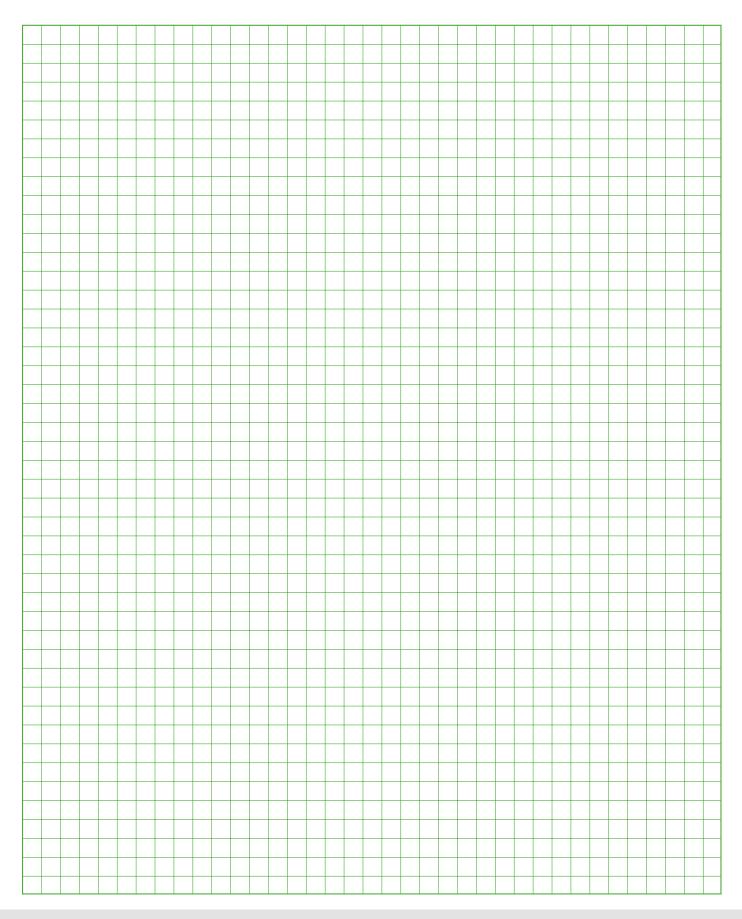

## Notes

This catalog describes machine models, scopes of equipment of individual models, and configuration options (standard equipment and optional equipment) of the machines delivered by SENNEBOGEN Maschinenfabrik. Machine illustrations can contain optional equipment and supplemental equipment. Actual equipment may vary in a tolerance range depending on the country to which the machines are delivered,
